

## Discussion and Informed Consent for Denture(s)

### Facts for Consideration/Patient initials required

\_\_\_\_\_ I understand that stability and retention of the denture(s) depends on many factors, including the attachment and fit of the denture(s) to natural teeth, implants if any, the amount and type of bone, gum tissue, and saliva, as well as my ability in placing and removing the denture(s).

\_\_\_\_\_ When using natural teeth as support, I understand my dentist may anesthetize (numb) my teeth and the gum tissue around the teeth. The teeth acting as support will be filed down along the chewing surface and sides to make room for the denture(s).

\_\_\_\_\_ I understand that holding my mouth open during treatment may temporarily leave my jaw feeling stiff and sore and may make it difficult for me to open wide for several days. This can occasionally be an indication of a further problem. I must notify my dentist if this or other concerns arise. This problem may require other treatment.

\_\_\_\_\_ I understand there may be gum soreness or discomfort under the denture(s). This can be relieved by the dentist with adjustments and tissue treatment. It may take several appointments before the denture(s) fit comfortably.

\_\_\_\_\_ I understand the new denture(s) may feel awkward for a few weeks until I become accustomed to them, and the denture(s) may feel loose while my cheek muscles and tongue learn to keep them in place.

\_\_\_\_\_ I understand my dentist will make every attempt to create a natural appearance for the denture(s); however, it may not be possible for the denture(s) to support my lip and facial contours perfectly.

\_\_\_\_\_ I understand eating with the denture(s) will require practice. My dentist has recommended I start with soft foods cut into small pieces and chew slowly, using both sides of my mouth at the same time, to prevent the denture(s) from tipping. I understand I need to be cautious when eating chewy, hot, or hard foods (for example: apples, popcorn, raisins, candy).

\_\_\_\_\_ I understand that pronouncing certain words may take practice. I can do this by reading aloud and repeating troublesome words. Sometimes the denture(s) will slip when I laugh, cough, or smile. I can reposition the denture(s) by gently biting down and swallowing. If a speaking problem persists, I will call my dentist for a consultation.

\_\_\_\_\_ Similar to natural teeth, I understand that my dentures require daily brushing to remove food deposits and plaque. My dentist has explained to me how best to care for my dentures and which products to use. I have to brush my gums, tongue, and palate with a soft bristled brush before wearing my dentures. If I do not properly clean or care for my dentures, they may stain, develop odor, and affect the way food tastes.

\_\_\_\_\_ I understand that any adjustments I make to my dentures can compromise the dentures and cause gum and cheek irritation and sores. If my dentures become loose, chip, crack, or break, I will contact my dentist immediately. Glue brought over-the-counter to repair a broken denture often contains harmful chemicals and should not be used on dentures. Adjusting my dentures on my own is not advised and may result in permanent changes to the dentures that affect their fit and function. This may also result in the need to remake the denture, which I understand will be at my own expense.

\_\_\_\_\_ I understand that I am required to keep regular care appointments with my dentist to maintain good oral health and ensure my denture(s) retain their proper fit and function. Failure to do so may result in injury or damage to my oral health including gums and jawbone.

\_\_\_\_\_ I understand that every reasonable effort will be made to ensure the success of my treatment but that success cannot be guaranteed.

**Benefits of Dentures, Not Limited to the Following:**

\_\_\_\_\_ I understand that a reasonable esthetic appearance may be achieved.

\_\_\_\_\_ With dentures, I understand my function and ability to eat will usually improve as opposed to being edentulous (without teeth).

**Risks of Dentures, Not Limited to the Following:**

\_\_\_\_\_ I understand that there are potential problems such as: periodontal (gum) disease, porcelain fractures, occlusal (bite) changes, stains and color changes, gum recession, food impaction, decay, excessive wear due to grinding and bruxing, temporomandibular joint dysfunction (TMD), and others.

\_\_\_\_\_ I understand that dentures may have characteristics and potential problems, such as: odor, chipping, and wear; stability and retention problems; changes in facial and lip appearance; and adaptation of the tongue and lips for proper speech. Periodic relines may be required as gum and bone may change over time, oral sensations may change, and good oral hygiene is imperative.

\_\_\_\_\_ I understand poor fitting dentures can cause constant irritation over a long period and may contribute to the development of sores. Failure to wear my denture(s) over a long period of time may affect the fit of the denture(s). My denture(s) may need to be relined or replaced. If my denture(s) being to feel loose or cause pronounced discomfort, I will contact my dentist.

\_\_\_\_\_ I understand a numb lip may occur from the pressure of the removable denture(s). This problem requires selective adjustment and in rare cases, a nerve might need surgical repositioning.

\_\_\_\_\_ I understand that the edge of the denture(s) usually rests on the gumline, which is an area prone to gum irritation, infection, or decay. Proper hygiene at home, a healthy diet, and regular professional cleanings are some preventative measures essential to control these problems.

\_\_\_\_\_ I understand that all medications have the potential for accompanying risks, side effects, and drug interactions. Therefore, it is critical that I tell my dentist of all medications I am currently taking and any medical conditions I am have. I attest that my medical history is up to date and accurate so that my dentist may ensure my safety during the procedure.

**Consequences if No Treatment is Administered, Not Limited to the Following:**

\_\_\_\_\_ I understand that I can choose to do nothing and my present complaints will continue and may worsen. Subsequent choices for dentition repair may become more difficult, expensive, or not feasible.

\_\_\_\_\_ I understand that if I do not replacing missing teeth, I risk compromised esthetics and possible drift of adjacent and/or opposing teeth into the space(s) with the resultant collapse of the arch integrity. This could also create or exacerbate a temporomandibular joint (TMJ) problem.

**Alternatives to Denture(s), Not Limited to the Following:**

\_\_\_\_\_ I understand that depending on the reason I am a candidate for a denture(s), alternatives may exist, including the use of dental implants to support the denture(s). I have asked Dr. Mark Poitras about them and their respective possible expenses. My questions have been answered to my satisfaction regarding the procedures and their risks, benefits, and costs.

No guarantee or assurance has been given to me by anyone that the proposed treatment or surgery will cure or improve the conditions listed above.

Initial only one of the spaces below that applies to you:

\_\_\_\_\_ I have had my questions answered to my satisfaction. I consent to have Dr. Mark Poitras perform the treatment as discussed. I authorize and direct this dentist, with his associates, to do whatever they deem necessary and advisable under the circumstances.

Or

\_\_\_\_\_ I refuse to give my consent for the proposed treatments(s) as described above and understand the potential for consequences associated with this refusal.
